

Where  
--- Generators

----- Nozzle for Back Turbines

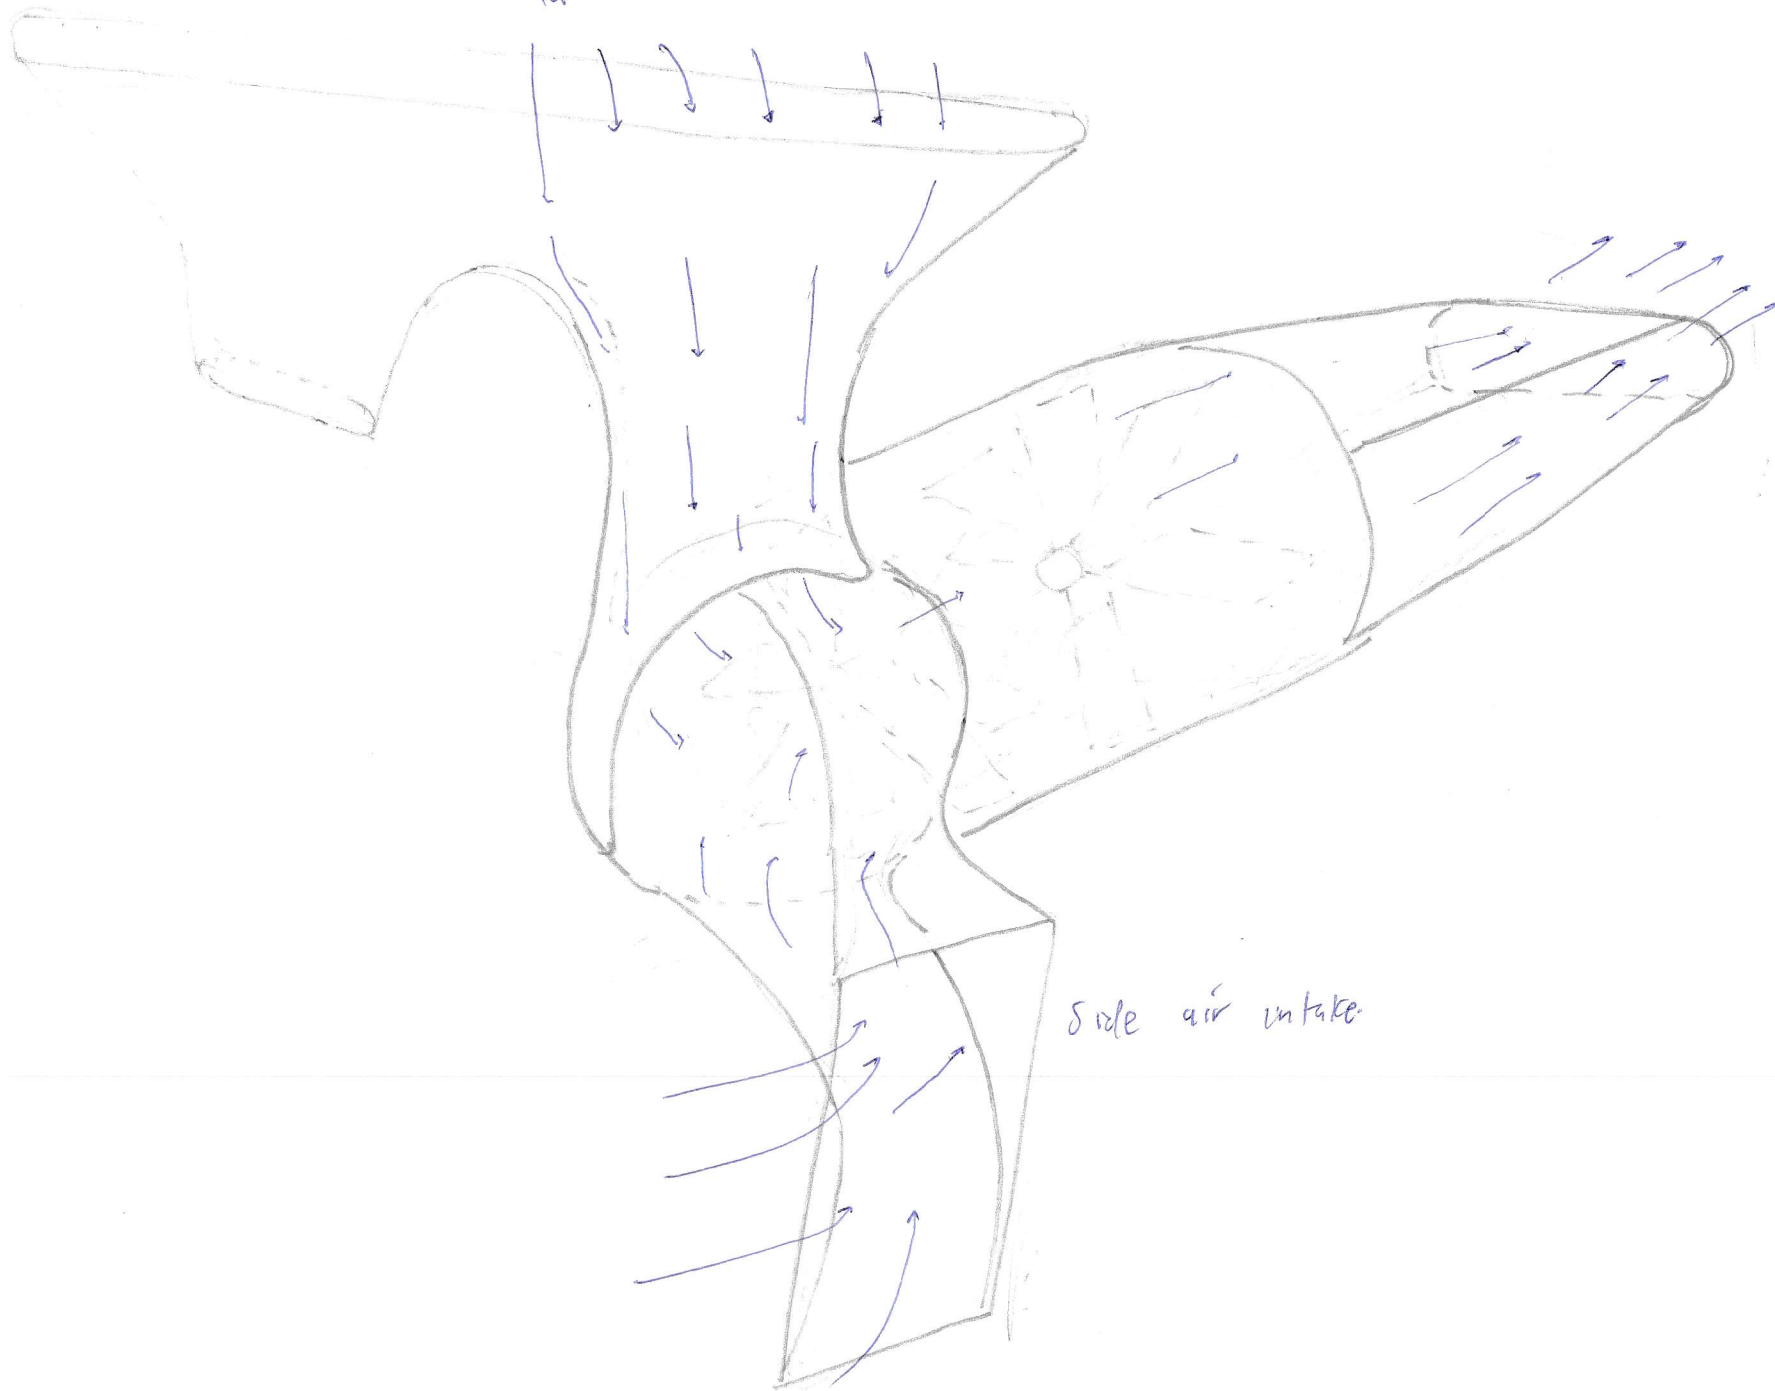

NOTE: Nozzle cross section accelerates the flow of air out of the turbine and creates a thrust force

BACK TURBINES

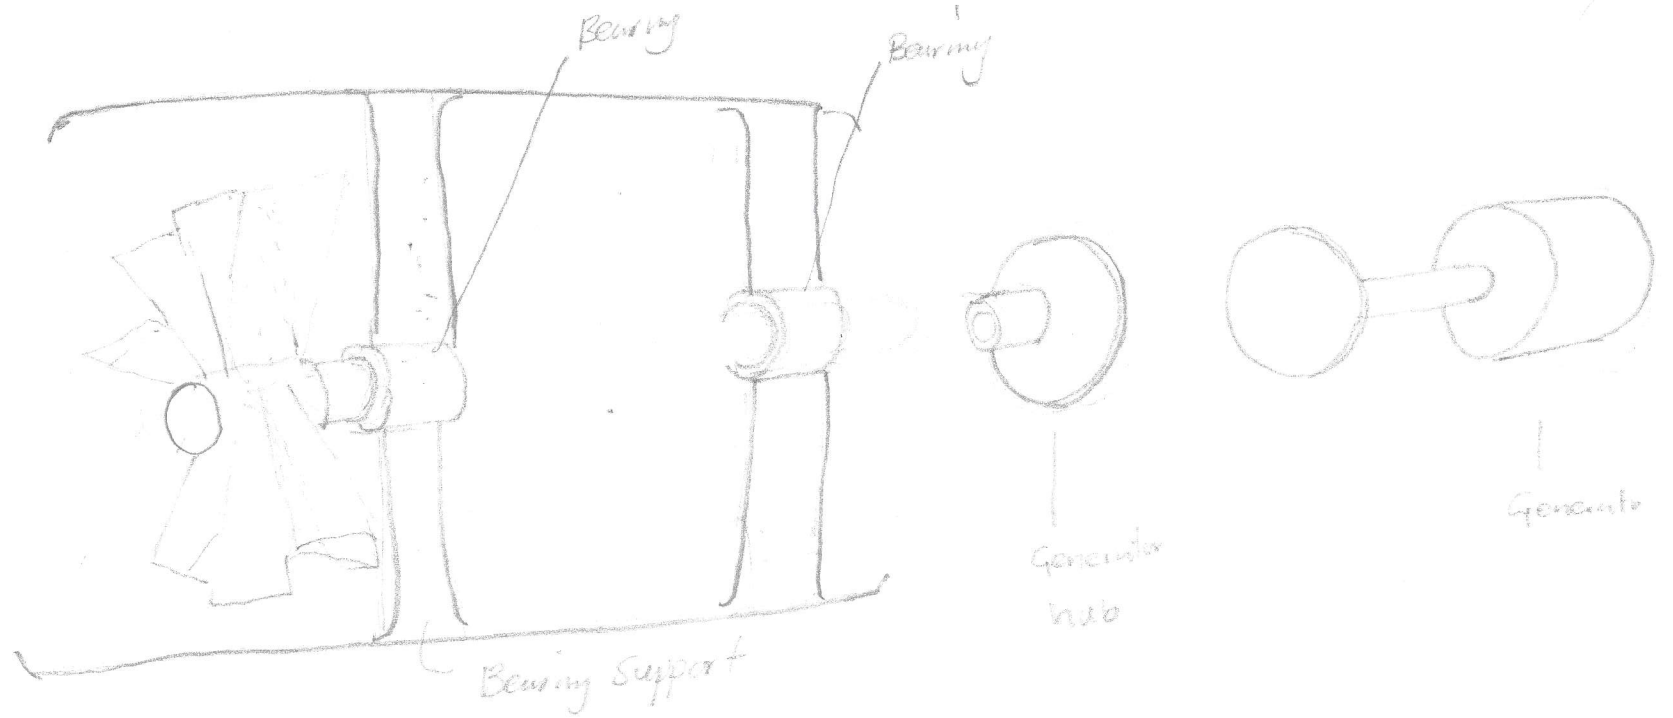

Top air intake

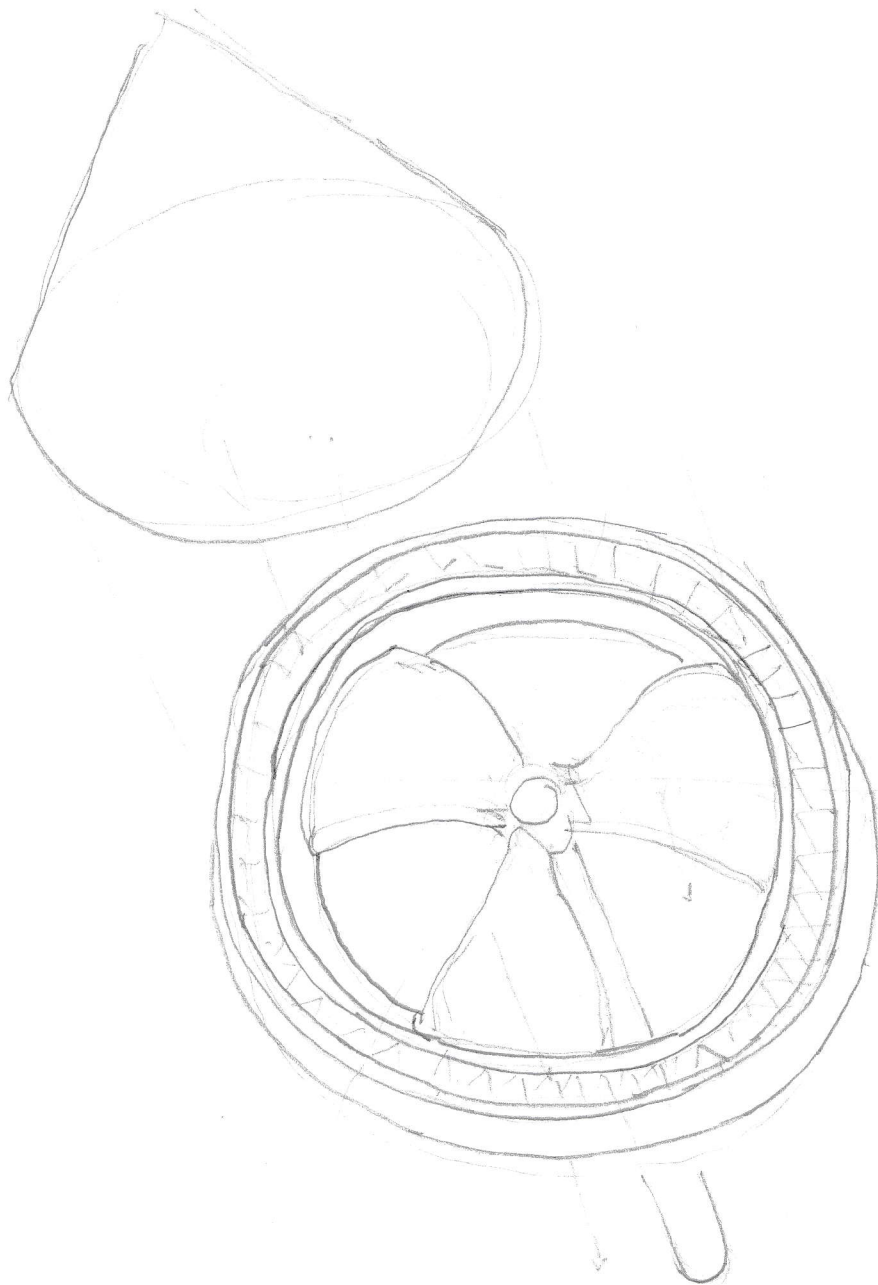

Side air intake

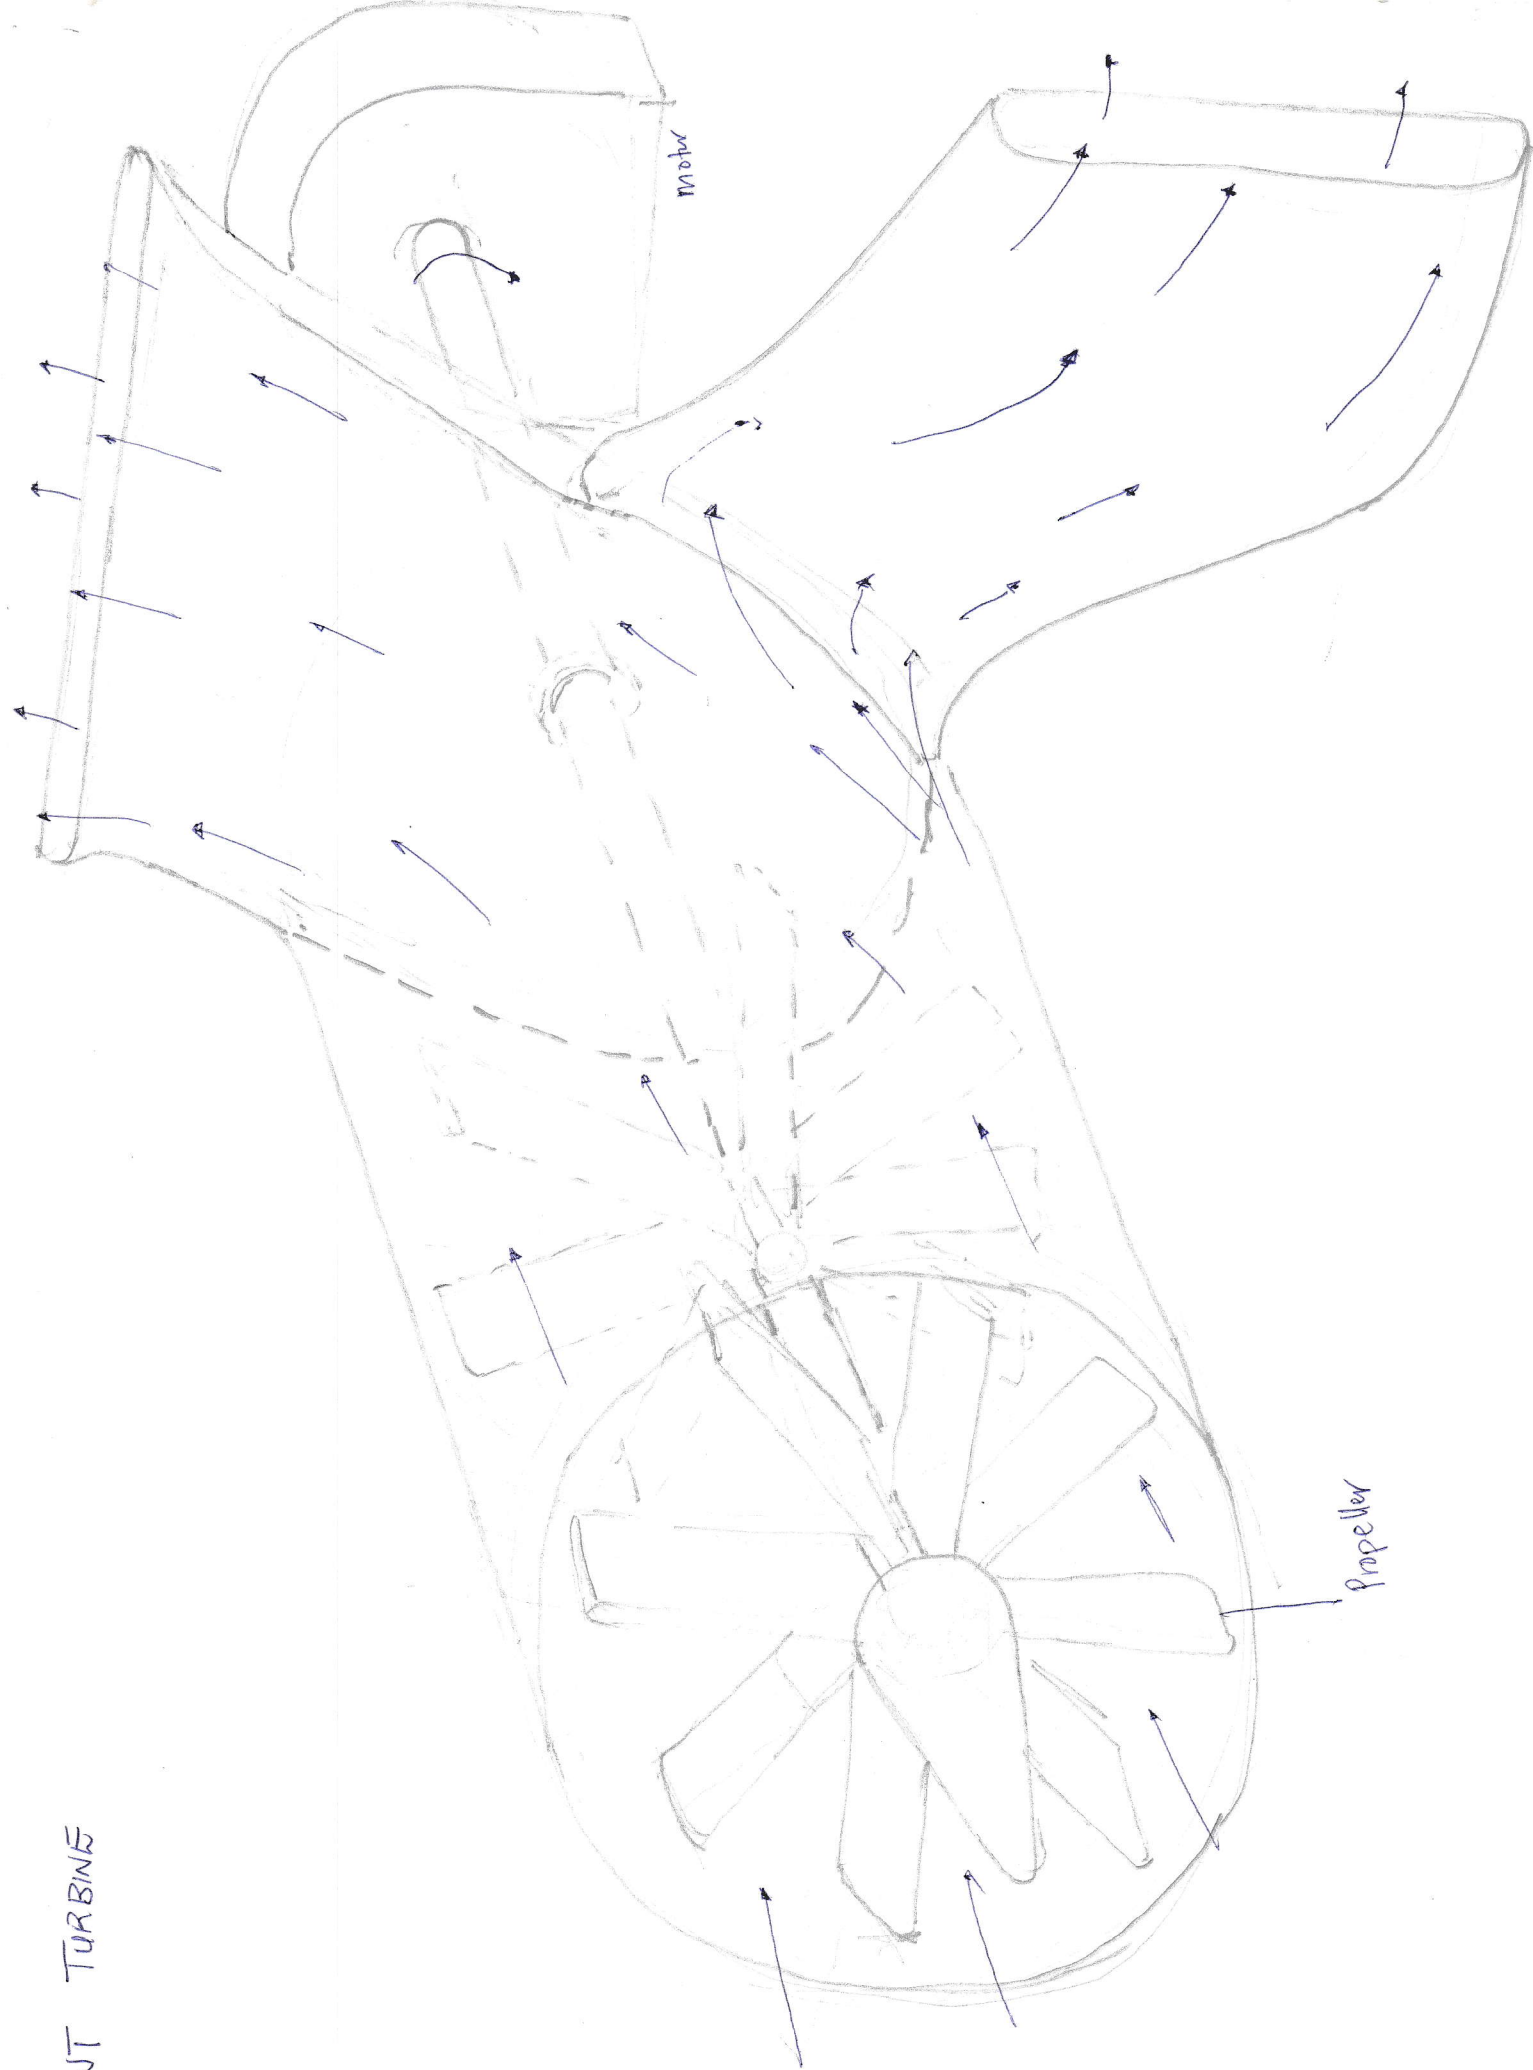

Feature:

1. easy assemble and maintenance

FRONT TURBINE

Where

----- Engine compartment  
generator

- Turbine Casings

----- Side doors  
air flow

----- Roof air  
flow

To accelerate the  
air flow out of the  
engine

Nozzle  
section

Generator

Turbine
